

WHOIS Data / Registration Data Reminder Policy

Registration Data Reminder Policy (RDRP) / Formerly Whois Data Reminder Policy (WDRP)

1. Purpose, Scope and Policy Name

This WHOIS Data / Registration Data Reminder Policy ("Policy") has been prepared by Atak Domain Bilgi Teknolojileri A.Ş. ("Atak Domain") to support the accuracy and currency of registration data associated with ICANN gTLD domain name registrations sponsored by Atak Domain.

The ICANN policy formerly known as the Whois Data Reminder Policy (WDRP) was updated on 21 February 2024 to reflect changes under the Registration Data Policy and was renamed the Registration Data Reminder Policy (RDRP). The current RDRP became mandatory on 21 August 2025. References to WHOIS/WDRP in this document are retained only for historical naming and terminology; Registration Data and the RDRP govern the current obligations.

2. Annual Registration Data Reminder Requirement

In accordance with the RDRP, Atak Domain presents the current Registration Data in its records to the Registered Name Holder for each applicable domain name registration at least once annually and reminds the Registered Name Holder to review that data.

The reminder may be provided at any time during the one-year period preceding the anniversary of the domain name's creation date in a manner that satisfies the RDRP. For registrations created on 29 February, the reminder may be provided no later than 1 March in non-leap years.

3. Information Included in the RDRP Notice

The RDRP notice includes the Registration Data elements that Atak Domain collects under Section 6 of the ICANN Registration Data Policy and maintains in its database for the relevant domain name registration. As applicable, the notice includes:

- Domain Name and Registrar information,
- Registered Name Holder / Registrant name and address elements maintained in Atak Domain's records,
- Technical Contact information, only if collected by Atak Domain pursuant to Section 6 of the Registration Data Policy,
- Original creation date and expiration date of the domain name,
- Nameserver information and other relevant Registration Data elements collected and maintained pursuant to Section 6.

The notice also clearly reminds the Registered Name Holder that the provision of false contact information can be grounds for cancellation of the domain name registration under the Registration Agreement.

4. Responsibilities of the Registered Name Holder

The Registered Name Holder is responsible for reviewing the Registration Data presented in the reminder and making any necessary corrections where information is inaccurate, incomplete, or out of date. If all information presented is accurate, no additional action is required solely because the RDRP notice was received.

Necessary updates may be made through the Atak Domain customer panel or the applicable registration management channels. Other ICANN policies and contractual obligations concerning the accuracy and currency of Registration Data remain applicable.

5. Method and Language of the Notice

The RDRP notice may be provided by email, web, postal mail, facsimile, or another appropriate method. The notice may be provided in one or more languages, provided that at least one of the languages is the language of the Registration Agreement.

6. Record Retention and ICANN Review

Atak Domain retains a copy of each RDRP notice, or electronic records showing the date and time the notice was sent and the content of the notice, in accordance with the applicable record-retention obligations under the Registrar Accreditation Agreement (RAA). Such records may be made available for ICANN review under the conditions set out in the RAA.

7. Inaccurate Registration Data and Possible Consequences

The Registered Name Holder is reminded that providing false contact information under the Registration Agreement can constitute grounds for cancellation of the domain name registration. Any suspension, cancellation, verification, or correction action is evaluated under the applicable ICANN policies, the RAA, the Registration Agreement, and other relevant requirements, rather than under the RDRP alone.

8. Policy Updates

Atak Domain may update this Policy to remain aligned with changes to ICANN policies, the RAA, or applicable law. The current version applies from the date it is published.

9. Official ICANN Sources

This Policy is based on ICANN's current Registration Data Reminder Policy (RDRP), Model RDRP Notice, and Registration Data Policy resources.
